Hi Donna,

Here are LA SOS and detailed reports on the two businesses you named. I have also attached a profile for Arlen B. Cenac that lists 41 businesses he is associated with. Please let me know which of these additional businesses you need SOS records and reports on, and I will gladly pull them. It would be helpful to narrow the list, but if all 41 are needed that is not a problem. Just let me know your research needs.

Thank you for your patience, and have a great day!

If you have time, please fill out a short survey about your library results:

Subject: Mr. Arlen Cenac

Tanya,

It was so nice to meet you in the library. I'm needing any information you may be able to research about Mr. Arlen (Benny) Cenac, of Louisiana. Other businesses that he owns are dba Cenac Towing Company, LLC and dba Poule D'eau Properties, LLC, all of Louisiana. Please include Secretary of State and Business Source Complete information. Thanks so much for your help. I can be reached at X7576 or by email.

Donna

Subject: RE: Cenac Enforcement Case (UNCLASSIFIED)

Brad,

Thanks you for responding to me. We were wanting to talk to somebody who is familiar with the Cenac Case. I'd be glad to talk to Bill. I'll call him and try to set something up. If there is somebody else who is more familiar, that would be great to talk to them. Just let me know. It is a pretty involved case.

Donna

Donna,

Sorry I'm just getting to this. I have meetings all day tomorrow, and I will be out Wednesday through Friday. However, I can potentially have Bill Nethery discuss Cenac with you.

Respectfully,

Brad Guarisco
Chief, Surveillance and Enforcement Section Regulatory Branch New Orleans District U.S. Army Corps of Engineers

Re: **P20090207/E2016024, Golden Ranch Farms, LLC**
Description: Revisions required to complete ATF CUP application
Location: Lat. 29° 40' 29.26"/Long. 90° 20' 27.21", Sec. 39, T16S-R21E. Temple Bay.
Lafourche Parish

Dear Mr. Thibodaux,

Thank you and Mr. Fred Dunham for meeting with OCM and USACE representatives here at LDNR on May 17, 2017, to review and discuss the unauthorized activities, the most recent application revisions for Coastal Use Permit (CUP) P20090207 submitted on May 1, 2017 (dated February 17, 2017) and what is needed to complete the application, and State and Federal regulatory and mitigation requirements.. As previously notified, Enforcement file **E2016024** has been opened to bring your project into compliance.

The following requirements to complete CUP application P20090207 were reviewed:

1. HABITAT IMPACT DATA:

Habitat impact data for the Temple Bay shoreline indicated Bottomland Hardwood habitat was present at approximately "Profile 10" (See Sheet 1 of 1 Habitat Data), yet on Cross Section Plat 10 of 22, "Profile 10" Marsh habitat is documented.

- a. Please review and update the Habitat Data Sheet submitted May 1, 2015 and/or the cross sections as required.
- b. In addition, if the habitat is confirmed as bottomland hardwood please indicate whether the spoil will be placed to the North or South of the tree line on land or in open water.

2. UNAUTHORIZED CONCRETE WAVE DAMPENING STRUCTURES:

As discussed, you indicated that the unauthorized concrete structures were installed for the prevention of shoreline erosion. To complete CUP application P20090207 please revise/include the following:

- a. **Elevation dimension:** Cross Section Plat 7 of 22, shows the total height of each concrete barrier is 3 feet. Please indicate the height/depth of concrete berm that is above the water bottom on Cross sections Plats 10 of 22- Profile 8; Plat 11 of 22- Profiles 11-15; Plat 12 of 22-Profile 16-18; Plat 13 of 22-Profile 21-24.
 - b. **Gapping/staggering required:** Please revise the plats to propose gapping or staggering of the concrete berms to allow for connectivity of the bay to the marsh habitat.
 - c. **Tagging:** Please propose marking/lighting concrete structures in accordance with U.S. Coast Guard regulations.
 - d. **Mean High and Mean Low:** Please indicate mean high and mean low on the cross section plats.
 - e. **Cubic Yardage:** Please add the cubic yardage of the concrete barrier to the total cubic yardage and ensure Step 10 of the application is updated.
3. **SPOIL BANK BERM:** Expired CUP P20011506 authorized dredging of water bottoms for the creation of a spoil bank in open water/along the bank lines, not to exceed 1.5 feet above marsh elevation or 2.0 NGVD, for the prevention of bank line erosion as previously required by CUP P20011506. The following is required:
 - a. **Berm elevation:** Please revise the plats to propose degradation of the spoil berms to 1.5 ft. above marsh elevation- settled or 2.0 NGVD (See Cross Section Plats 9 of 22-Profile 4; Plat 10 of 22-Profile 7-10; Plats 11 of 22-Profile 11-12; Plat 12 of 22-Profile 16-17 & 20; Plat 13 of 22-Profile 23-25). Also, please indicate where the degraded spoil will be deposited and if spread at what elevation.
 - b. **Gapping:** was required to ensure connectivity between the bay and the marsh habitat behind the berm. Please propose a plan to install gaps in the existing continuous spoil berm. As discussed, NMFS requirement of 50-foot gaps every 500- feet is recommended.
 - c. **Profile labels:** Please revise Profile Plat labels from "Breach" refurbishment to "unauthorized" shoreline refurbishment. (See Plats 9-13 of 22).
 - d. **Cubic yards:** Please label the dredged material in cubic yardages not Sq ft. on all Profile Plats. (See Plats 9-13 of 22).
4. **RIP-RAP:** Please include the proposed elevation of the rip-rap on Plat 7 of 22-Section A-A.
5. **APPLICATION UPDATES:** Please ensure the cubic yardages and acreages documented on the plats match steps 10 & 11 of the applications.
6. **HISTORICAL LAND LOSS DATA:** This information was previously requested as part of the NAJ process to justify the need for shoreline erosion protection and the Office of State Lands Land reclamation permitting requirements. Twenty years of records were requested. Five years were received. It has been determined that the 5 year data supplied is sufficient. No further data is needed at this time.
7. **SALINITY MONITORING REPORTS:** Annual monitoring reports at the 5 previously approved salinity monitoring stations were required to be submitted prior to April 1 of each year per CUP P20011506. As discussed, no reports have been received to date. Plat 22 of 22 indicates a proposal to install an additional 2 "outside" monitoring stations and that monthly salinity reports and photographs for each station (3 inside the system, and 4 outside of the system) will be taken on a monthly basis and submitted annually.

- a. Please mark the proposed location of two additional monitoring stations on the plat.
 - b. Please note: as of now OCM and other commenting agencies will require the same monitoring language as previously conditioned in CUP P20011506.
8. **SHAPE FILES:** Please submit revised shape files including the dredging, spoil placement and concrete barrier limits.

As discussed during the meeting the following is a general plan of action:

- Once the revisions have been received a follow-up field investigation will be coordinated between you and all commenting agencies.
- The Office of State Lands will provide an updated determination as to whether a Class A Permit will be required. As revisions are being processed, if you would like to coordinate efforts with their office, please contact Les Rosso at 225-342-4600.
- In addition, LDWF and USACE/NMFS will have to provide comment as to whether the concrete wave dampening structures can remain in place or will be required to be removed so it is recommended you coordinate your efforts with these offices as revisions are being processed to minimize project revisions.
- Once the Follow-up Site Visit has been completed, and if there are no revisions required, processing of the mitigation proposal will begin. As discussed, OCM and USACE's compensatory mitigation requirements may differ. Project benefits will be evaluated to determine if they outweigh impacts. In addition, a one-year-growing-season may be conditioned prior to assessing the status of the marsh habitat post project to determine if any compensatory mitigation would be required.

At this time, OCM requests your full cooperation and requests that you submit a revised after-the-fact application and plats for P20090207 to include the aforementioned information and documentation. **Your response is required within sixty (60) days from the date of this letter.**

Pursuant to La. R.S. 49:214.36, the Secretary of the Department of Natural Resources may suspend or revoke a Coastal Use Permit and/or levy an Administrative Penalty should the permittee fail to comply with the terms and conditions of a Coastal Use Permit or have submitted false or incomplete information. Any unauthorized activity carried out within the Louisiana Coastal Zone may be subject to an administrative penalty and/or mitigation fees and restoration or civil proceedings.

Should you have any questions or comments, please contact me at (225) 342.4602, by email: heather.evans@la.gov, or at the address listed on the first page of this correspondence.

- c. If the answer to B.5.b is "Yes," briefly describe, including new maximum daily inflow rate (if applicable).

- d. Provide dates imposed by any compliance schedule or any actual dates of completion for the implementation steps listed below, as applicable. For improvements planned independently of local, State, or Federal agencies, indicate planned or actual completion dates, as applicable. Indicate dates as accurately as possible.

Implementation Stage	Schedule	Actual Completion
	MM / DD / YYYY	MM / DD / YYYY
- Begin construction	___/___/___	___/___/___
- End construction	___/___/___	___/___/___
- Begin discharge	___/___/___	___/___/___
- Attain operational level	___/___/___	___/___/___

- e. Have appropriate permits/clearances concerning other Federal/State requirements been obtained? ☐ Yes ☐ No

Describe briefly: _____

B.6. EFFLUENT TESTING DATA (GREATER THAN 0.1 MGD ONLY).

Applicants that discharge to waters of the US must provide effluent testing data for the following parameters. Provide the indicated effluent testing required by the permitting authority for each outfall through which effluent is discharged. Do not include information on combined sewer overflows in this section. All information reported must be based on data collected through analysis conducted using 40 CFR Part 136 methods. In addition, this data must comply with QA/QC requirements of 40 CFR Part 136 and other appropriate QA/QC requirements for standard methods for analytes not addressed by 40 CFR Part 136. At a minimum, effluent testing data must be based on at least three pollutant scans and must be no more than four and one-half years old.

Salinity Monitoring Plan for the Existing Gate Structure Located at Golden Ranch Farms, L.L.C (CUP #P20090207)

We are sending you an attachment with the location of 3 salinity monitoring points inside the system and 4 salinity monitoring points located outside the system. My client proposed to collect monthly salinity data readings from these existing (5) and proposed (2) monitoring stations. Photos will be collected at sites 1, 2, 3, 4, 5, 6, and 7 along with salinity data at the lease once per month and the data sent to LADNR -Coastal Management Division on a yearly bases.

Daily readings at 52 gates
The existing gate will remain open at all times unless the salinity reading on the outside of the gate (at station O-4) reaches a level of 5 ppt. The gate will be closed until the salinity reading is below 5 ppt (at station O-4). In addition, the gate will be closed at the approach of a hurricane and reopened as soon as possible after danger from the hurricane has passed and the salinity reading is less than 5 ppt (at station O-4).

See plat with station locations. (See sheet 5 of 24)

Subject: [Non-DoD Source] P20090207-E2016024 Meeting Follow-up

Good afternoon, Thank you all again for meeting with me to move this application forward. Please see the attached follow-up letter recapping the May 17, 2017 meeting. I've also attached CUP P20011506 and the marked-up plats for

CUP application P20090207 for your review. I was unable to scan the plats in color at this time. To view in color and/or if the attachments are too large to send I will have them uploaded to SONRIS under the P20090207 application for your review.

If you have any questions please let me know.
